OBJECTIVE

Detail-oriented and results-driven Data Analyst with extensive expertise in Python programming, machine learning, and data visualization. Skilled in data analysis, predictive modeling, and client collaboration, I aim to leverage my knowledge to drive impactful data-driven decisions. Seeking to contribute to a dynamic, growth-oriented organization where my analytical skills and innovative approach can help shape strategic outcomes and support organizational success.

EDUCATION

Bachelor of Science in Mathematics,
Bharathidhasan University   2022 - 2025
CGPA - 7.5%

SKILLS

Technical Skills	Python, OOPS Concept, Data Visualization, Data Manipulation, Analytical Skills
Soft Skills	Communication, Problem-Solving, Time Management, Collaboration, Flexibility
Other Skills	Project Management, Performance Optimization, Continuous Learning, Technical Skills

EXPERIENCE

Freelance Data Analyst
Self-Employed   *Remote*

- Analyzed complex datasets and created interactive dashboards using Python, OOPS Concept, Data Visualization, Data Manipulation to provide actionable insights for clients.
- Collaborated with clients to understand business needs and delivered customized analytics solutions, improving strategic decision-making.
- Performed data cleaning and transformation to ensure accuracy, reducing data-related errors and enhancing overall data quality.

RELEVANT PROJECTS

Game Data Sales Analysis: This project uses Python to analyze video game sales data, focusing on trends and patterns. It involves data cleaning, exploratory analysis, and visualization to uncover key metrics and insights, helping optimize marketing strategies and game development. [(Try it here)](#)

Nifty Index Analysis : (Feb '23 - Feb '24) This Python project analyzes the Nifty Index from February 2023 to February 2024. It involves data cleaning, trend analysis, and visualization to identify market trends, performance patterns, and key insights. The analysis aims to help investors understand index behavior and make informed decisions. [(Try it here)](#)
